

Government of Pakistan Pakistan Meteorological Department Pakistan Monthly Climate Summary May 2025

In brief

- The national mean temperature of 31.07 °C was warmer than the country-average of 28.94°C with an anomaly of +2.12 °C and ranked 5th highest in past 65 years
- The daytime (maximum) temperature of 38.38 °C at country-level also happened to be warmer by +2.12 °C than the country-average of 36.26 °C.
- The country-level nighttime (minimum) temperature of 23.72 °C too was significantly warmer by +2.60 °C than the countrywide average of 21.12 °C and ranked 2nd highest in past 65 years.
- The hottest day of the month was observed at Sibi (Balochistan) on 23rd when it recorded a maximum temperature of 50.5 °C. Whereas the stations Jacobabad & Dadu proved to be the warmest place with a mean monthly maximum temperature of 45.4 °C.
- The coldest night temperature of 5.0 °C of the month was recorded at Bagrote (Gilgit-Baltistan) on 31st May whereas, the stations Bagrote (Gilgit-Baltistan) and Rawalakot (AJK) happened to be the coldest place with mean monthly minimum temperature of 9.6 °C.
- The national area-weighted rainfall of 17.30 mm was **slightly above average** with a positive anomaly of +16% in May-2025.
- The heaviest one-day rainfall of 58.5 mm occurred at Muzaffarabad Airport (AJK) on 23rd May. Coincidentally, the same station has been the wettest place with monthly total of 182.3 mm.
- The Weak La Niña conditions have turned into neutral phase i.e. neither La Niña nor El Niño with sea surface temperatures anomaly (SSTs) around -0.01°C over the central equatorial Pacific.
- The Indian Ocean Dipole (IOD) is in neutral phase.

Table-1: National Weather Extremes during May 2025

Hottest day	50.5 °C	at Sibi (Balochistan) on 23 rd
Coldest day	12.5 °C	at Astore (Gilgit-Baltistan) on 31st
Coldest night	5.0 °C	at Bagrote (Gilgit-Baltistan) on 31st
Warmest night	33.5 °C	at D.G. Khan (Punjab) on 19 th
Wettest day	58.5 mm	at Muzaffarabad Airport (AJK) on 2 nd
Wettest month	182.3 mm	at Muzaffarabad Airport (AJK)

Synoptic Summary

In the month of May, there were four westerly waves entered through Western & Northern parts of the country during 1-6, 9-15,17-20, and 22-31, which gripped upper Khyber Pakhtunkhwa, Gilgit-Baltistan, Kashmir, Northern Punjab and parts of Southern Punjab, Balochistan, Upper and eastern Sindh. Resultantly, few moderate to rather heavy falls with isolated hailstorms and dust-thunderstorms occurred at scattered places in Khyber Pakhtunkhwa, Gilgit-Baltistan, Kashmir, Punjab & Northeast/west Balochistan and isolated light rain/drizzle occurred at few places in Upper & lower Sindh during the period. While Seasonal (Heat) low oriented over Northwest Balochistan from day 1st to the end of month, whereas another Heat low prevailed over Southern Punjab during 11-24 May then shifted over Eastern Sindh on 25th and continued to persist till months' end. A severe heatwave struck few days over the plain areas of Punjab, Sindh, Northeast & South Balochistan during the month.

Rainfall: Slightly above normal as a whole in the country.

Climatologically, May is considered as an average rainy month with rainfall contribution to the national annual total and season Apr-Jun (AMJ) being 5.0% and 26.6%, respectively. During the month, Pakistan experienced few moderate to rather heavy rainfall accompanied with few hailstorms/dust storm in Khyber Pakhtunkhwa, Punjab, Gilgit-Baltistan, Kashmir and in Northwest/Northeast Balochistan. The daily area-averaged rainfall is shown in Fig-1.

The May 2025 with only 17.30 mm rainfall was **slightly above average** with a positive anomaly of **+16%** for Pakistan as a whole. Whereas a diverse situation was observed on regional scale, the worst dry conditions observed in Gilgit-Baltistan with 16.70 mm (-39%), and Khyber Pakhtunkhwa with 30.30 mm (-30%) rainfall were **below-average.** In contrast with the above two regions, Sindh with 10.20 mm (+248%) ranked 04th highest (58.7mm rainfall recorded in 1999) and Balochistan with 10.70 mm (+79%) observed excessively above average rainfall. The region Punjab with 22.30 mm (+43%), also recorded the

above average rainfall. The region AJK with 63.90 mm (+6%) region to have exhibited a near average rainfall (Table-4). The heaviest one-day rainfall of 58.5 mm occurred at Muzaffarabad Airport (AJK) on 2nd May. Coincidentally the same station has been the wettest place with monthly total rainfall 182.3 mm (Table-1).

Table-4: May 2025 Area Weighted Rainfall

Region	Rank (of 65y)	Normal (mm)	Average (mm)	Departure (percent)	Comment						
Pakistan	42	14.90	17.30	16	-

May 2025 Rainfall maps

Fig. 2. May-2025 spatial rainfall distribution and departure from normal

In addition to the wettest station Muzaffarabad Airport (AJK), some other individual stations also have recorded a notable rainfall, i.e. Murree 177.0 mm, Muzaffarabad City 142.5 mm, Garhi Dupatta 136.3 mm, Islamabad(ZeroPoint) 118.2 mm, Kakul 107.0 mm, Chaklala Airbase 103.0 mm, Cherat 95.4 mm, Rawalakot 94.8 mm, Malam Jabba 93.0 mm, Chakwal 87.0 mm, Islamabad, Airport 85.9 mm, and Attock 82.6 mm.

Some of the stations remained absolutely dry with no rain during the month i.e. Parachinar, Karachi Airport, Karachi Faisal, Karachi Masroor, Shaheed Benazirabad, Thatta, Dadu, Tando Jam, Sakrand,

Gawadar, Jiwani, Panjgur, Pasni, Turbat and Ormara. Whereas the stations: Sahiwal, Mirpur Khas, Dalbandin, Nokkundi, and Quetta (Sheikh Manda), recorded only traces of rainfall during the month.

Area Averaged Temperatures (°C) in May 2025 and anomalies from normal 1961-1990

-------	--------	-------------	---------------------	--------	-----------	-----------------	------

Area Average Mean Temperatures (significantly above-average temperatures)

The May 2025 national mean temperature of 31.07 °C was significantly warmer than the countryaverage of 28.94 °C with an anomaly of +2.12 °C and ranked 5th highest in past 65 years (the record is 32.08°C in 2000). A similar situation prevailed on regional scale i.e. Gilgit Baltistan with 22.17°C (+3.52 °C) ranked the 3rd highest mean temperature of the month during past 65 years (the record is 23.04 °C in 2001), Azad Jammu & Kashmir with 23.90°C (+2.72°C) and Balochistan with 31.41(+2.25°C) both ranked the 4th highest (record being 24.86°C & 32.78°C both recorded in 2000 respectively), Sindh with 34.68°C (+1.49°C), Khyber Pakhtunkhwa with 27.81°C (+2.75°C) both recorded the 6th warmest temperature of the month (the record is 35.21°C in 2010 & 29.25°C in 2000) & Punjab with 33.00°C (+1.53 °C) all recorded significantly warmer than average temperatures. (Table-5, Fig.3 lower panel). The mean temperature anomalies ranged from +0.0 °C to +5.6 °C in the country with those being considerably higher over western Balochistan and Gilgit-Baltistan.

Area Average Maximum temperatures (significantly above-average temperatures)

The country-level monthly mean maximum (daytime) temperature of 38.38 °C of the month was also significantly warmer by (+2.12 °C) than the country average of 36.26 °C. So was a trend at regional scale; Gilgit-Baltistan with 29.81 °C (+4.46 °C) and Balochistan with 39.03 °C (+2.70 °C) both ranked 05th highest (the records are 31.67°C & 39.83°C both recorded in 2001 respectively), AJK with 31.09 °C (+3.16 °C) recorded th 8th warmest of the month during past 65 years (the record is 32.98°C in 2000), Khyber Pakhtunkhwa with 35.10 °C (+2.84 °C), Punjab with 39.91 °C (+0.81 °C) and Sindh with 41.73 °C (+0.65 °C) all recorded above-average maximum temperatures. (Table-5, Fig-3 upper panel). The mean maximum temperature anomalies remained in the range from -0.6 °C to +6.4 °C in the country with those being considerably higher over Gilgit-Baltistan.

Area Average Minimum temperatures (significantly above-average temperatures)

The country's monthly mean minimum (night-time) temperature of 23.72 °C in the month was also significantly warmer, by +2.60 °C, than average 21.12 °C and ranked the 2nd highest of the past 65 years (the record is 24.42°C in 2000). A similar trend was found across the regions i.e. Gilgit Baltistan with 14.56°C (+2.64°C), Sindh with 27.61°C (+2.38°C) both ranked the highest mean minimum in past 65 years (the record were 14.34°C and 27.22°C both in 2001 respectively), Balochistan with 23.76°C

(+2.44 °C) and Khyber Pakhtunkhwa with 20.48°C (+2.54°C) both ranked 3rd highest (the record being 25.03°C and 21.04°C in 2000), AJK with 16.64°C (+2.25 °C) ranked the 5th highest (the record being 17.32°C in 2001) and Punjab with 26.05°C (+2.92°C) ranked the 6th highest (the record is 27.49° in 2000) all recorded significantly warmer than average minimum temperatures (Table-5, Fig-3, middle panel). The mean minimum temperature anomalies ranged from -1.7 °C to +7.9 °C in the country with those being considerably higher over Western Balochistan.

The hottest day of the month was 50.5 °C recorded at Sibbi (Balochistan) on 23rd May. Whereas, the stations Jacobabad & Dadu happened to be the warmest place with average maximum temperature of 45.4 °C during the month. The lowest night (minimum) temperature of the month was 5.0 °C recorded at Bagrote (Gilgit-Baltistan) on 31st May, whereas the stations Bagrote (Gilgit-Baltistan) and Rawalakot (AJK) happened to be the coldest place with mean monthly minimum temperature of 9.6 °C.

* means value occurred multiple times

<u>Note</u>

Monthly Climate Summary is produced by Pakistan Meteorological Department, Climate Data Processing Centre, Karachi to provide the main features of weather events occurred in the country during the month. The summary contains detailed data information of 25 climate stations of Pakistan. The extremes & analysis is based on 110 numbers of stations. The information in the summary is based on real time data and/or electronic reports, therefore, the above results can be considered only preliminary. Climate Summaries are usually published in the first week of each month. Long term average for rainfall is for 1961-2010 (50 years) while normal period for temperature is 1961-1990 (30 years). The records mentioned for area-weighted rainfall and area average temperatures have been examined for the past 65 years i.e. from 1961-2025.
